

the astronaut	grows plants	in space
the space ship	flies	on the moon
the rocket	drives a rover	around Jupiter
the pilot	rides a moon buggy	on Mars
the moon	is made of cheese	in the greenhouse
the star	found a rock	on a cold planet
an asteroid	goes fast	from the space ship
a comet	sleeps	on a space walk
everyday	turns upside down	right now
last year	on my birthday	this morning
yesterday afternoon	since Tuesday	Friday night
